---

## TECHNICAL SKILLS

---

Languages: JavaScript, HTML, CSS

Frameworks: Node.js, React, Express, Redux, Mocha, Chai, Jasmine

Products: PostgreSQL, Umbraco5, Heroku, Postman, Redmine, NopCommerce, WordPress, Shopify, PixiJS, ViroReact

---

## PROJECTS

---

### go.bARk | Developer |

October 2020

An Augmented Reality App where the user interacts with a virtual dog, using ViroReact, React Native, Express, PostgreSQL, and Redux.

- Devised navigation and user interface.
- Engineered user experience through chained animations and interactive scenes.
- Built in haptic feedback for sign in and tug-of-war components and layered in AR raycasting to adjust game view to real-world planes.

### Chai Noon | Developer | Heroku: [chai-noon.herokuapp.com](https://chai-noon.herokuapp.com)

September 2020

A mock e-commerce site selling tea products built with PostgreSQL, Express, React, Node.js, Mocha, Redux, and Chai.

- Designed different user experiences for the cart, including guest and login/OAuth merge functionality.
- Wrote test specs for API routes and database models.
- Converted React components to be responsively designed.

### PromiseHS | Sole Developer | Heroku: [promise-hs.herokuapp.com](https://promise-hs.herokuapp.com)

October 2020

Sliding Ice Puzzle style game, using Express, React, and PixiJS. Hackathon project.

- Created unique sprites and animations for characters using TexturePacker.
  - Implemented collision detection and event-handling to provide feedback during gameplay loop.
- 

## WORK EXPERIENCE

---

### Fullstack Academy

November 2020 - Present

Software Engineer, Teaching Fellow

- Taught computer science fundamentals, programming concepts, debugging techniques, and various libraries to 50+ students.
- Mentored 5 different teams and oversaw web application projects from inception to completion.

### Foresters Life Insurance and Annuity Company

December 2015 – January 2019

Team Leader, Inforce Services

September 2018 - January 2019

Assistant Supervisor, Inforce Services

November 2017 - September 2018

- Led team of 15+ members in interdepartmental projects in a fast-paced transitioning environment.
- Successfully spearheaded cleanup of internal processes and bottlenecks, bringing open items down from 8000 to fewer than 250 in 30 days.
- Reduced average processing time of financial transactions by 3 business days, and intercarrier exchanges by 3 weeks.

### We are Immediate, Inc.

July 2012 – December 2015

Marketing Associate

- Ticketed and tested bug fixes along various stages of development for new web application and assessed UX issues, leading to its second release.
  - Headed CX and led training of different Content Management Systems for web applications.
- 

## EDUCATION

---
